Dyslexia

Dyslexia: is a learning disorder defined by a significant difficulty in learning to read and write, in the absence of neurological and/or sensory alterations that justify it, having previously received school opportunities for its learning.

Dílexia

- ▶ Genetic and neurological origin
- ▶ Psychopedagogical diagnosis

Children

- ▶ Immersed in an educative, sanitary and social system that does not take into account their **features** and does not adapt to their **needs**
- ▶ Creates **difficult emotional situations**, which in many cases lead to **school failure** (drop out)

Public organizations, and society in general, have the obligation to act to avoid the disadvantages of this collective

Understanding Dyslexia

A proper understanding of dyslexia by educators and families avoids negative effects on “psycho-affective development”

- ▶ They are not *clueless*, *lazy* or *dumb*, adjectives commonly used to describe them
- ▶ About 10% of the population
- ▶ One is dyslexic 24h

What is Adixmur?

Association formed by **families** and people directly or indirectly related to dyslexia and other learning disabilities

Main aim: To respond the difficulties that this children find in their academic and personal lives due to this learning difficulty

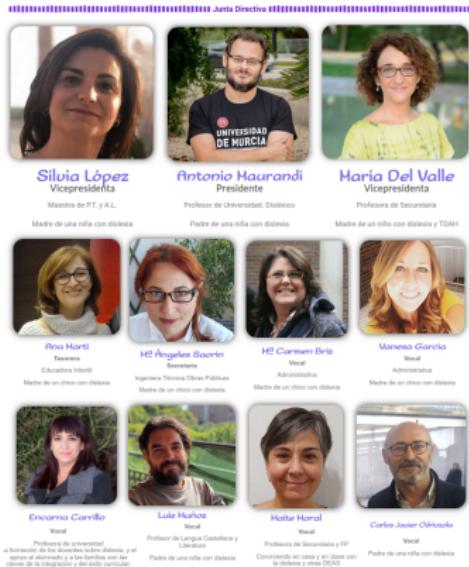

What do we do?

We guide families so that they do not feel alone, guiding them on the path they take in search of the best care for their children and encouraging them to achieve the maximum possible development

- ▶ Family a “key piece”
